Though my heart may chase (Take my heart)

Luke Catley

Verse 1

```
                E
Though my heart may chase after earthly things
        C#m
I have found they fail in the joy they bring
                A   B                C#m
Compared to you, compared to you
```

Chorus

```
                        A
'Cause you are the light
                              E
That bursts through the clouds
                    A
Rain that brings life
                    E
To this desert ground
                  A
You are the hope
                   C#m
That I can be found
                   A              B
Your love is reaching out to me
```

Verse 2

I have found there's peace in this sweet embrace
Held by hands with scars, wounds that speak of grace
I come to you, I come to you

Bridge

```
                                E
Take my heart and make it yours again
            B/D#       C#m
Purify my heart with holy flame
                              A
Burn away my fears and shame
                              B
Help my life declare your name
                              C#m
Take my heart and make it yours
                               E
Help me speak in truth and love like you
                  B/D#                C#m
Share your grace and peace in all I do
                           A
Let your spirit here increase
                           B
More of you and less of me
                               E
Take my heart and make it yours
```
